VISUM TECHNOLOGIES PLC
("Visum", "Visum Technologies" or the "Company")

Extension Contract Signed with Children's Day Foundation

Visum Technologies Plc (AQSE: VIS), a leading provider of cutting-edge ride capture technology, is pleased to announce the successful extension of its contract with the Children's Day Foundation Linnanmaki, a company incorporated in Finland, for an additional three years (the "Extension Contract"). The Extension Contract is expected to generate approximately £100,000 in revenue for Visum over the next three years and will automatically terminate unless renewed by mutual written agreement.

The Extension Contract reaffirms Visum's commitment to delivering innovative imaging solutions that enhance the guest experience at Children's Day Foundation's attractions. Under the terms of the extension, Visum Technologies will continue to provide its state-of-the-art ride capture technology on the Tiaga ride, allowing visitors to relive and share their experiences through high-quality digital and print media. This contract builds upon the successful collaboration between the two organisations and highlights the ongoing demand for Visum's advanced imaging solutions.

Commenting on the extension, **Marc Dixon**, CEO of Visum Technologies, said:

"We are thrilled to extend our partnership with the Children's Day Foundation. Our innovative ride capture technology has been instrumental in enhancing guest engagement and providing unforgettable memories. This extension underscores the confidence our partners have in our solutions and reinforces our strategy to expand within the attractions sector."

This contract extension represents another significant milestone for Visum Technologies as it continues to grow its global footprint and enhance the visitor experience through AI-driven imaging solutions.

ENDS

About Visum Technologies

Visum Technologies Plc (AQSE: VIS) is a video technology firm primarily focusing on the global leisure market. Their mission is revolutionizing video capture's potential, initially targeting specialized niches within the leisure industry. Visum captures, generates, and distributes branded, real-time digital video content from extreme environments. They do this through a combination of proprietary hardware and software solutions that can be distributed and shared on all leading social media platforms. Whenever Visum identifies complementary technologies that can enhance its core offerings, expand its global presence, or facilitate entry into new markets, they are open to partnerships or acquisitions.
